Submission file: [webform\_submission:values:submission\_file]

Submission: Team, Two people with a laptop and soem current GIS access could have ground truthed every single CPCP 2020 affected property in less than a 75 work weeks. Instead 20 plus earnest soulshave spent 3000 work weeks beavering away at desk tops trying desperately hard to see what isn't on the ground and turning a blind eye to what is. No one has been fooled by the smoke and mirrors, the lack of consultation and the marketins spin. The CPCP 2020 is a pig with lipstick and is as time and resource wasting as teaching Shakespeare to monkeys, a waste of time and annoying for the monkeys. Its time to get out here and have a look, just as the two leading lights in saving the Cumberland Woodlands did in 1997 - 2000. Benson and Howell came out, opened their eyes, walked the ground and manually created the OEH [REDACTED] Cumberland Woodlands Map. A resource still as unassailable in scientific credit 20 years later as it was then and truly a document of scientific worth on which good policy could be made. You guys have failed to come within a bulls roar of their achievement. You've taken a top of the line european marque luxury car, spent \$5 million and three years to create a two wheeled tricycle. Come out come out and take a look.
