Submission: I object to risking the current chlamydia free thriving koala population. The government itself has commissioned 2 recent enquiries into how we can save the koalas from extinction and yet the same parliament cannot follow its own recommendations. There can be no further habitat loss if we want to save our koalas. We need to stop encroaching on agricultural land. Productive soils need to be used to produce food, not be covered over with housing, roads and infrastructure. We need to start working with nature if we want a liveable future
