Subject: Don't destroy the rare bushland of western and south western Sydney.

Attention: minister Kean.

Dear Mr. Kean, again, your government wants to destroy valuable bushland in western Sydney. Western Sydney is a basin and pollution trap. We don't need anymore housing and anymore people, we are full. With more problems going to happen with this bad and soul destroying airport out at Badgerys Creek, (24/7, no curfew, is not what we want) and your government offering us already set set aside offsets to say your preserving bushland sounds like a lot of bull shit. I don't want to see see the last remnants of Cumberland plains woodlands been destroyed so that you can give the okay to developers to destroy valuable bushland to build more suburbs and houses. It is truly disgraceful that your government and others don't care at all for our environment.

[REDACTED] Seven Hills, 2147.
