To whom it may concern

Hi my name is [REDACTED] and I'm a resident of Orchard Hills ,my property consist of 3 different [REDACTED]
[REDACTED] Around 2-3 weeks ago a letter was sent out showing a blue rectangular zone in property [REDACTED], in regards to the meeting we had that was organised by Tanyia Davies at St Marys in the event of biodiversity yes we where explained regarding certain areas but in the course of my property what is blue zone red zone etc. Regarding topographical readings unless actual people on foot take proper contour readings does not justify in regards to what has been sent out. Between property [REDACTED] and resdent due east to ours theirs close to 2 metres in height compared to their property , if the contours where to what your obviously gone to yes I would agree. What I'm trying to state here without having independent evaluation of proper survey you cant just evaluate eye from the sky , in regards to proper contour and proposals on peoples property's in regards to all this I've been in this type of industrie for 35 years unless you actually walk sites there is always discrepancies. Again thanks for your time an answer prior to your short fall of government approval would be most appreciated.

[REDACTED]
