Dear Sir/Madam

RE: SUBMISSION - DRAFT CUMBERLAND PLAIN CONSERVATION PLAN

Thank you for the opportunity to review the Draft Cumberland Plain Conservation Plan. We act on behalf of a landholder at Lot [REDACTED], Bootles Lane, Pitt Town NSW.

Upon review of the draft Cumberland Plain Conservation Plan Exhibition Viewer, we note that mapping over the above address has been provided at landscape rather than property scale, which does not represent the extant native vegetation distribution accurately.

We have undertaken detailed mapping of vegetation structure and assessments of ecological communities over the site using the Biodiversity Assessment Method. Please find attached refined vegetation mapping for the site.

It would be our clients view that this mapping be incorporated into the plan / exhibition viewer. Spatial data has been attached to our electronic submission and can be provided in an alternate spatial format upon request.

We trust this is sufficient for your purposes, however should you require any further information or clarification please do not hesitate to contact Chris Spraggon (Ecologist) or the writer.
