To the planning department

As resident of the Wollondilly Shire for the past 38 years, [REDACTED] (Wilton) we are voicing our opinions in objection to the Draft Cumberland Plain Conservation plan, proposing to rezone 138 properties from RU2 TO E2.

We moved to Wilton in 1982 to have a country living lifestyle that was not too far from the townships of Wollongong and Campbelltown, since then great changes have taken place in Wilton from Bingara Gorge, to Wilton Green and like everything in life progress is good for the community.

I would request the planning committee to review their decision on just how badly it will affect the 138 landowners, their kids and grandkids.

We feel we have been left out and let down, as infrastructure, thousands of homes and utilities are being built around us, yet we are prohibited to do anything.

It's a huge risk to our future and that of our families, we will be impacted negatively if this is to go through.

If at all, leave the zoning to RU2 but allow the committee and the council to present to the 138 families, the opportunity to sub divide the land into 5 acres lots and this way there is minimal to no environmental impact at all and would give some financial assistance and also allow the offspring the chance to build their own homes.

**Regards**
