**Submission**

This IES is a receipe for disaster.  
To replace trees with green roofs is beyond belief.  
To destroy native habitat will lead to massive native animal, reptile and insect deaths.

The government proposes to make the land a land of concrete.

The temperature will rise creating an atmosphere in which all living beings will utimately die.

The developers will drive tanks through the loopholes.

Who designed this piece of garbage?

**I agree to the above statement**  
Yes
