Hello

I've reviewed the draft Strategy and SIC plan, and they present a very positive vision for the region's future.

However, in these post COVID times it is important that government foster growth and activity in the regions.

Walker would therefore suggest that the government consider subsidizing the SIC contribution until 2022.

the government currently subsidises the SIC in Sydney's South West and North West Growth Areas.

We suggest that the Illawarra Shoalhaven would benefit from government support, as much, if not more, than areas in north west Sydney.

This is pertinent to government objectives for more affordable housing.

Regards
