

IRON GATES DEVELOPMENT DRAFT MASTER PLAN DA2015/0096

Revised State Environmental Planning Policy No. 71 Master Plan –Iron Gates, Evans Head

To whom it may concern,

My issues of objection with this plan is that the cultural, wetlands, environment, water quality is not good in the Evans Head River already, this development will make it worse.

The cultural and heritage significance of this area and the company not complying with previous court orders for the proposed site to be remediated.

The subdivision on such small blocks.

There is no approval for this by NSW Rural Fire Service.

Regards,

Lisa Davis

Evans Head NSW 2473
