Submission: I object to the Iron Gates development on the grounds of safety incase of fire. How would everyone get out of there in a emergency, with one narrow road access. Which fire brigade would they use if other fires around. The fire break would have to be enormous to protect that many houses in the middle of the bush. Which would remove more trees and wildlife habitat. I think the whole development is wrong, think of somewhere else to have a smaller land release and leave " the jewel in the crown" alone, PLEASE...
