Submission

I strongly support all efforts to increase density and housing options in an area as rich in transport and amenities as Pyrmont. I hope to see a greater emphasis on active transport options, in particular linking the bridge road cycleway to the city in a more efficient manner. I live [REDACTED] but take the anzac bridge to work in the city as it is far more safe and separated even though it is far less direct. A link from bridge road to pyrmont that doesnt involve a long, narrow shared path and several extremely slow traffic lights would make my and many other's commutes faster, and encourage many of my new neighbours to ride a bike or walk instead of drive.

I agree to the above statement

Yes
