Submission

Based on the overall plan for the Bay precinct the proposed development of high to medium density housing on current SFM site is inconsistent with the overall plan to make the area a world-class place for residents and visitors to enjoy the natural vistas of the area.

45 storey unit blocks are not compatible with the current environment of the Pyrmont foreshore.

The lack of open space for residents and visitors to enjoy also flies in the face of the overall plan for the entire area as initially proposed.

There should be plenty of open space for all to enjoy not just a small piece that is adjacent to the Wentworth Park Greyhound Track.

Pyrmont, Glebe, Balmain and surrounding areas provide inner city living space and the opportunity to provide hard working people from all walks of life with good quality of life for work, play and recreation all of which are vital to the well being of a work class city.

There are enough high rise apartments in the area without adding more. The same goes for the expected increase in traffic that would be generated by such a monstrous over development of the site.

You have promised to deliver world class amenities.

The current plans for that site seem only to benefit developers not the overall community.

Please reconsider the application and amend it to be more in tune with community feelings and wishes

I agree to the above statement

Yes
