Submission

I formally present to you the Hello Kitty Pyrmonument!

Just as you may have guessed, it is a 93 metre tall monolith dedicated to Hello Kitty. You may be asking "Why?". Well. I think that this statue may just save Sydney. It will house an ice rink, gift shop, vegan restaurant, bubblegum pop night club AND a viewing platform where impressed visitors can gaze at the Sydney skyline from Miss Kitty's gleaming eyes! The statue will be built of glimmering limestone, polished to a point where the sun reflects off her cute cat body, blinding anyone who looks directly at her. I think that this is important because Hello Kitty is:

- A) Cute
- B) Fun

Hello Kitty's hobbies include traveling, music, reading, making new friends, and eating cookies that Mimmy bakes. She also enjoys baking herself, and she loves her mother's apple pies. Furthermore, Hello Kitty likes tea parties and exploring.

Anyways, I think this is a great idea - so please let me know when construction begins!

Kind regards,

Jack

I agree to the above statement

Yes
