Submission

I am objecting to the height of the buildings. The increased traffic that will come with all the extra units. The roads are all 40 kms and local traffic only sign posted roads. These are not policed at all. Are the proposed new bus routes going to replace the 389. The 389 May have been ok when the route was first implemented but now with all the bus no longer serves it's original purpose the stops need to be revised as well as the imetable.

I agree to the above statement

Yes
