Submission

I believe the proposed airport is a major mistake on various levels, including air and noise pollution, limited life as an airport, due to realisation that efficient and economical transport to Eastern Australian major cities will be better served by Very Fast Rail. The future energy supply of the world is electricity supplied by Hydrogen gas and solar energy. Australia will be the major supplier of Hydrogen power to the world. Air transport with large passenger loads will be limited to overseas and much longer trips than Sydney and Melbourne.

I agree to the above statement

Yes
