

## ***Have your say on the precinct plans***

Thursday 26<sup>th</sup> November

Dear Department of Planning Representative,

I am a Year 8 Cranbrook student studying the topic of Place and Liveability in Geography. One aspect of my course is learning about the aspects that create the “perceptions of liveability” and how these aspects contribute to the overall sense of wellbeing and quality of life to a specific location.

My teacher introduced our class to the Government planning that is currently being undertaken for the new Western Sydney Aerotropolis. She has asked us to provide feedback to your department and rate the planning that is being undertaken for the aerotropolis using the perceptions of liveability criteria that we have learnt in class. In order for our feedback to be valid she has also asked us to support our opinions with evidence.

Please see my comments and feedback below

Kind Regards,

Nicholas Dudman

Overall the work that the NSW department of planning has planned is very positive and works to increase liveability in all criteria's.

Perception of Liveability criteria	Feedback	Evidence
1. Stability	Stability includes safety, employment, economy, Agribusiness precinct is expected to create 10,000 jobs by 2056. This will help produce more money into the economy. Overall the Aerotropolis will create 200,000 jobs. Having safety is also important for stability by having police and	I found the information from Western Sydney Aerotropolis inside of the NSW GOV planning website.

	fire stations as well as hospitals.	
2. Environment & Culture	<p><u>Environment</u> Overall the work that is being implemented in terms of the environment is very positive. By planting more vegetation and trees it will cool down the West which is very much needed as of the moment as it is at the bottom of a basin which attracts heat. By also adding trees it will ensure that Badgerys Creek does not become an urban heat island such as Penrith and Black Town. There is an adequate amount of green space and parkland which will intern grow a sense of community and culture. Having a better environment overall helps the livability of Badgery Creek.</p> <p><u>Culture</u> In general, the work that is being done to increase the aspect of culture is overall very positive as I can see that the NSW department of planning plans to implement walkways, plaths and parks which will all increase the culture of Badgerys Creek and intern increase liveability.</p>	I can see through the use of concept images that the NSW department of planning plans to implement features to Badgerys Creek which will improve the things I have just listed which will intern increase liveability.
3. Health Care	Health care is very positive as it ensures a safe environment and lifestyle. Badgerys Creek should implement a health check when you enter and exit the aerotropolis to make sure the country is safe from	Articles and websites have shown that health checks are mandatory in places that have had recent outbreaks and cases of COVID-19. They also mention wearing

	COVID-19. They should also make you wear a mask if necessary.	masks if absolutely necessary.
4. Education	Education will be a necessity in Badgery as children need to be provided with it to be able to learn and be the new generation in the future. Without education the economic level will drop greatly due to the lack of knowledge and guidance to provide money.	I have found this information with the help of websites and sources which explains the importance of Education and how it benefits society.
5. Infrastructure	The proposed SIC provides for developer contributions of up to \$1.1 billion to be collected from developers to deliver important State and regional infrastructure. The types of infrastructure the SIC is expected to help fund: Roads, Public Transport, Having good infrastructure would be important for population growth as it creates more room for people to visit or live in Badgery.	The evidence is the articles that I have scrolled through to find all the information. Also the images displayed on the Aerotropolis Special Infrastructure Contribution.
