Department of planning

My husband and I have lived in Bringelly for over 30 years, we have owned this property

█ The Northern Rd for over 20 years.

We understand and except progress and have known there was a chance of an Airport for over 40 years.

What the planning department are doing with the Aerotropolis is absolutely devastating and unfair to a lot of land owners, and developers for that matter eg: Ridiculous fees and contributions they are required to pay (only in the Aerotropolis).

A major problem with your study is Creek lines have been retained even where no creeks appear.

The maps are NOT ground true.

For example, our property shows a water course running straight through the middle of our property and home, which obviously is incorrect. The water course runs down the boundary of our property which leaves over 4.5 acers of developable land, but you have earmarked the entire 5 acers as green.

We have two homes on this property plus a large shed and have never had a problem with water retaining on this block.

My husband is a hard worker and usually looks at the positives, but in the last few months I noticed a big change in him when we discuss what's going on around here. It breaks my heart to see my husband like this.

The Department of planning need to remember the people whose lives they are changing by looking at a computer and not physically looking at the land.

Hopefully common sense prevails

Lena cini

I agree to the above statement

Yes
