Submission

I am writing to you regards the Bringelly Aerotropolis and the zoning of Environmental/Recreational on 82% of our property. I would like to know the basis of an environmental significance to my property as I have been moving my property for the last 20 years. How can Governments rezone it to this knowing there is nothing environmental on our property.

We need a serious investigation here as the disgraceful lack of information and the more disgraceful community transparency and no one gives us NO information as they couldn't answer any questions, are we suppose to just accept this?

We all accept that a 2nd airport is necessary and we have been told some land will be acquired, I must say at least they have will have certainty, they can sleep at night, since bringing the new luliip out I have not had a good nights sleep, who should take responsibility for our stress and anxiety?

Land in the South Creek precincts as we know that some of these lands are 1in100 flood per liverpool councils and sit in low, medium and high flood plain, if this affected land is required to use as E&R, why isn't Governments putting in the corridors to purchase that part at market value? Why isn't the mixed use development taken to the low and medium where it is perfect developable land?

We hope that they do the right thing by all these residents and not have a repeat of the mid-north coast saga..

I appreciate your time and would appreciate your existence in this matter, do the right thing.

I agree to the above statement

Yes
