Submission: I would like to say how disappointed I am that anyone would cut up this beautiful prime farming land for industry. I feel there is plenty of land in the area that already has industry around it and is not prime farming land. We live on Mary Gilmore Rd and I feel that if the industrial area came out that far that would impact my life and my children's lives with smells, pollution, increased noise increased traffic and increased crime. When we bought our property there was a law that you cannot get a building permit on anything less than 500 acres of prime farming land as there was a need to preserve prime farming land so I cannot understand why they would chop up all this beautiful prime farming land to put ugly industrial estates. We have a lot of native animals in this area and I feel that would impact their intrinsic rights - we have recently had 2 echidnas on our property which I feel was really rare to see and very exciting for myself and my children. We also have a lot of frill neck lizards birds, kangaroos and wallabies. We purchased our property thinking we were going to live in a peaceful beautiful area and I feel so privileged to have lived here. I strongly disagree with this proposal and hope WWCC can see sense that this would be detrimental to our lives and the lives of our children and the lives of our beautiful native animals
