First Name: Emma

Last Name: Reynolds

Name Withheld: No

Email: [REDACTED]

Suburb/Town & Postcode: 2650

Submission file: [webform_submission:values:submission_file]

Submission: I declare a conflict of interest as i work with WWCC and my husband works for TNSW who has been instrumental in starting the process of all the SAPs and is still involved. In saying this, we live at [REDACTED] We purchased it in January. Whilst the reports you have had commissioned are not accurate in relation to our property and also to [REDACTED] We sit on top of a hill with 360 degree view and our house is not listed on any of these reports. We live here and yet no consideration for our home. We can smell the odour which is fine, we accept this, however at times it is beyond liveable with the smell of Sulphuric acid being released and physically makes our kids sick. the noise is also an issue, not too often yet can hear. We have a mound specifically built to have the sound bounce over the house. Best that can be done. We have beaming lights from Teys Cargill shinning at night with the glare in the house. Perhaps covers facing down may assist. regardless, we request our house/ property whilst in the 'Buffer zone' is still affected. Report Todoroski air sciences figure D-1 location of dwellings within the precinct boundary fails to show our house, It also fails to show our neighbours house at [REDACTED] I would like noise and odour effects for this property investigated. Our house is on the hill and has high noise and high amounts of odour concentration. This is not recorded on your investigation and needs to be considered. 1E2D2E The noise, pollution and lightning does not stop (as shown on diagrams) on our property. this needs to be considered, Will the residents be consulted on what type of trees are planted along Bavin Road reserves? 190066 Trees that are native and create mess along these corridors are a road safety risk with the animals living in there and unsightly in visual appeal. What are stack locations??? as our property has No stacks permitted, Higher performing stack locations and Preferred stack locations all 3 on our property. 58C2EB We look forward to your response Regards Emma
